

Focus

PART OF **LIXIL**

In a world intent on saving our most precious resource, the Cobra Focus range combines sleek, modern design and state-of-the-art water saving technology. Focus is a sophisticated range that suits the contemporary, eco-savvy home and environmentally friendly public spaces that place a priority on water efficiency and conservation.

Range features and benefits:

- The flow rate of 1.9 litres per minute from the four basin mixers promotes water saving whilst still ensuring effective hand washing.
- Aesthetically pleasing diamond spray water pattern from basin mixer spouts.
- Fitted flow restrictors and aerators are easily cleaned and serviced.
- Ideal for use in public spaces.
- Focus basin mixers are supplied with three water flow solutions:
 - Comes fitted with the 1.9 litre per minute MIKADO designer flow restrictor.
 - A 6 litre per minute pressure compensating flow restrictor for general water saving requirements.
 - Unrestricted flow straightener for low water pressure installations.

MIKADO Aerator

The four Focus basin mixers come to you fitted with a MIKADO flow restrictor. The flow of this Red Dot design award winning aerator is restricted to 1.9 litres per minute, ensuring ultra water saving.

The aerator is also pressure compensating, meaning that the maximum flow of 1.9 litres per minute will not be exceeded regardless of fluctuation in inlet water pressure to the tap.

The MIKADO aerator is ideally suited for hand washing in public spaces, whilst the designer spray pattern will add a touch of glamour to any bathroom.
