10 YEAR WARRANTY

All products have a service life of 25 years and carry a 10 year warranty against manufacturing defects. Most baths may be converted to spa baths the components of which carry a 1 year warranty.

100%

QUALITY WARRANTY

Libra baths pass through a vigorous quality check at the factory before being dispatched to our customers. This lets us confidently give customers a 10-year warranty on all Libra baths, against any manufacturing fault provided the bath has been correctly installed.

ACRYLIC LINING

All Libra baths are made from premium, sanitary grade, cast acrylic which allows for the manufacture of unique, seamless designs and premium finishes with uncompromised quality and benefits. All Libra baths are non-slip, able to withstand high water temperatures and retain water heat for longer so you get to enjoy a safer, longer bath in a Libra bath.

WORLD-CLASS TECHNOLOGY

Libra is the only manufacturer in Southern Africa equipped with auto-clamping stretch and free-standing moulding machines. Reverse moulding is crucial in making our free-standing baths surround in pure acrylic and maintaining high-tech, accurate moulding.

CLEAN & HYGIENIC

Acrylic and manufacturing vacuum form processes ensure an impervious, non-porous lining that's resistant to common household chemicals. It's easy to clean and retains the high-gloss, smooth finish of our baths for longer.

LIBRA GREEN

The Libra factory uses intelligent, sustainable initiatives, ensuring that every bath, from the materials to the manufacture process, has been guided by strict ecological and economical requirements and created using the least environmentally impactful methods. This, coupled with a considered design, brings water conservation to the home. This all forms part of Libra's aim at reducing CO2 emissions and the drive of "LIBRA GREEN".

ARMOUR STRENGTH

The underside of each bath is strengthened with a multi-layer of specially formulated resin mix called Libra Armour Coat. This provides robust, long-lasting strength in each product.

5-STAR SERVICE

Service teams are located throughout Southern Africa and are able to provide assistance. This ensures a quick reaction time to any post-production concerns you may have. They also provide installer training.

EXCLUSIVE DESIGN

Libra's in-house innovative development teams manufacture specific and exclusive designs for a particular customer or market. These are made to the same world-class standard expected from every Libra bath.

BATH CARE

100% acrylic bath lining with no multi-layer extruded process allows minor scratches to be polished out.

INTERNATIONAL STANDARDS

Libra exports worldwide, giving you peace of mind that all Libra baths are made to the international EN198 standard - the recognised, premier bath standard.
